Hillsborough County Election Information

During an active election cycle, our office distributes files containing information about Mail Ballot voters and early voters. These files are produced in accordance with Florida Election Law and the rules adopted by the Florida Division of Elections.

Early Voting information is available to the public.

Mail Ballot voter information is only available to authorized members of the public as defined in Florida Election Law (section 101.62 (3)).

According to the Division of Elections' rules, the Mail Ballot Status files are sent to the Division each day beginning 60 days before a State-wide primary election and continuing until 15 days after the corresponding State-wide general election.

Early Voting information is available once early voting has begun for an election and continues until the early voting period ends. Please refer to the [State's Public File Access](#) page to access these files.

If you are authorized under section 101.62(3) of Florida's Election Laws and have obtained a login id from Hillsborough County's Supervisor of Elections office, please press the "Login" button below to access your Mail Ballot Information Files. If you are authorized and have received (or wish to receive) a State of Florida Division of Elections login, please use the [State's Public File Access](#) page to retrieve your files.

Converting Election Data into Excel

1. In Excel, click **File > Open** and select the file provided by the Supervisor of Elections.
2. On the first dialog of the Text Import Wizard, select **Delimited** and click **Next**.

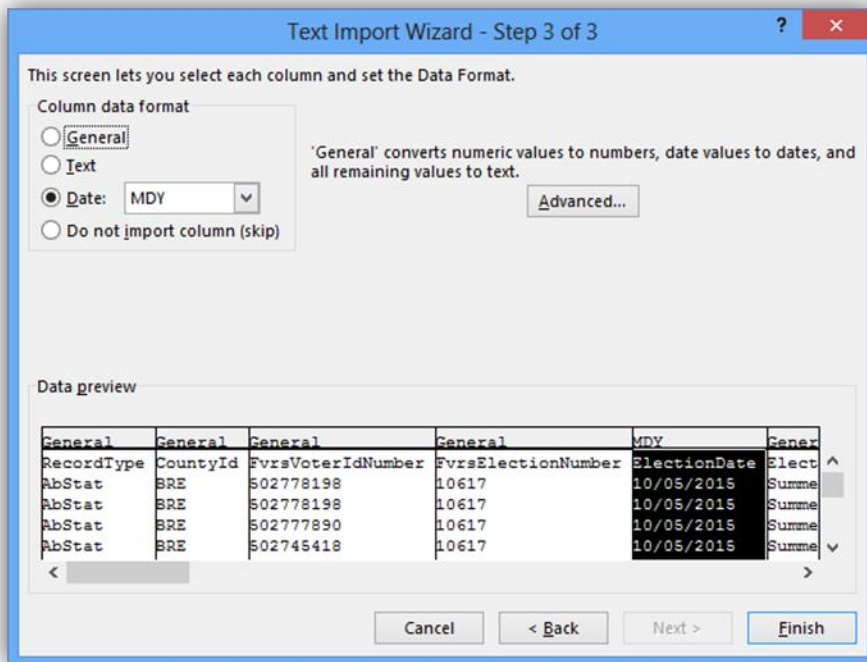

3. On the second dialog, under **Delimiters**, select **Tab** if the file does not contain commas or **Comma** if the file has commas between the data elements. (If you aren't sure which delimiter to use, select the one that separates the data in Excel's **Data Preview** pane, so it looks like the example below.)

4. Clear the other check boxes in the **Delimiters** box. Leave the **Text Qualifier**, as quote character ("). Click **Next**.
5. The third dialog of the wizard shows the data format at the top of each column. By default, all columns are formatted as **General**, which aligns all fields to the left. You can change the format of any column by clicking in it and selecting a different format under **Column data format**.

For example, you might, want to change data fields to a **Date** format, as shown in the example here:

6. Click **Finish** to load the file into an Excel worksheet.

Understanding the Vote By Mail Ballot Request Information File

Vote By Mail Ballot Request Information File— Lists county voters who have requested a Vote By Mail ballot for an election, the status of the request, and other relevant data. Voters with protected addresses are excluded from the file.

This file is automatically created and sent to FVRS daily (overnight) beginning 60 days prior to an election and ending on the 15th day after the election. If a general election is preceded by a primary, a separate file is sent for each election.

The file contains information processed up to close of business on the day prior to the overnight run. Each daily file contains all Vote By Mail voters to date, not just new additions. The file name is <county ID>_ABL_<FVRS election number>_<date of run>_<time of run>.

Contents of the file, reading left to right:

County ID	Voter registration ID	FVRS Election number
Election date	Election name	Date absentee summary record last updated
Absentee request status: C—Canceled E—Voter error N—Unsigned P—Provided R—Requested (for this election) S—Requested (all- elections/FPCA) U—Returned Undeliverable V—Voted	Absentee request date	Absentee delivery date
Absentee return date	Absentee request canceled date	Military flag
Overseas flag	Military dependent flag	Precinct
Party	Voter name	Mailing address
Email address	Fax number	

Note: The Vote By Mail request status S denotes voters who have a standing request, while R denotes voters who requested a ballot for this election only. When Vote By Mail requests are generated for all elections voters, all S voters who are eligible to vote in the election will subsequently appear twice in the Vote By Mail Ballot Request Information File: once with the S status and again with the R status. Any all-elections/FPCA voters who are not eligible to vote in the election will only be listed once—with the S status. Those voters will not be listed again with an R status, since they will not receive a ballot.
